

I learnt too many things from this application's questions it encourages me to join team abhiyaan(which ia absolutely the best team ever in IITM) I learnt about virtual box and working of it and installation of ROS using ubuntu in virtual box making of nano files, making of workspace using catkin, many more about simulation like turtlesim, pothole detection and many more things it is a exellant experience while doing questions of the application after doing this all I am full of enthu and eagerly wanted to work with such a great team and contribute something in it

In short it was the great experience of my life

Thank you
